The screenshot shows the Microsoft Azure portal interface. At the top, there's a navigation bar with the Azure logo and a search bar. Below it, the breadcrumb trail reads 'Home > Storage accounts (classic) > Create a storage account'. The main heading is 'Create a storage account'. Underneath, there are tabs for 'Basics', 'Advanced', 'Networking' (which is selected), 'Data protection', 'Encryption', 'Tags', and 'Review'. In the 'Networking' section, the heading is 'Network connectivity'. A paragraph explains that you can connect to your storage account either publicly or privately. Below this, under 'Network access', there are three radio button options: 'Enable public access from all networks' (which is selected), 'Enable public access from selected virtual networks and IP addresses', and 'Disable public access and use private access'. A blue information icon is next to the first option, with a note that enabling public access might make the resource available publicly and that a more restricted access type is recommended. At the bottom of the page, there are three buttons: 'Review', '< Previous', and 'Next : Data protection >'. A 'Give feedback' link is also present in the bottom right corner.

Tags

Review

Tags are name/value pairs that enable you to categorize resources and view consolidated billing by applying the same tag to multiple resources and resource groups. [Learn more about tags](#)

Note that if you create tags and then change resource settings on other tabs, your tags will be automatically updated.
